DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6 and 15-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Krippelz (US 5,410,934).

Krippelz discloses a bandsaw with guide heads comprising all the elements claimed including, inter alia, a frame (e.g. 22); a worktable (e.g. 36); a bandsaw blade (e.g. 28a, b); a first blade tensioning device (38); and rotational bearing (e.g. 80, 104). See whole patent especially Figs. 11-13.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were

Art Unit: 3724

made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 7-14 and 18-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Krippelz (US 5,410,934) in view of Yoneda et al (US 6,439,094).

Krippelz discloses the invention substantially as claimed except for the set/unset pattern of the cutting edge. Note that Krippelz already includes teeth set at both sides - Fig. 13. However, Yoneda et al teaches various teeth arrangement having sections of both set and unset teeth, the set teeth being on either side of the blade for the purpose of providing better cutting characteristics to the saw or bandsaw blade. See whole patent. Thus, it would have been obvious to the ordinary artisan at the time of the instant invention to provide the invention of Krippelz with the set/unset pattern of the cutting edge as claimed as taught by Yoneda et al in order to facilitate more efficient cutting of materials.

Regarding claim 10 and similar, it appears that the modified invention of Krippelz includes the pitch between different teeth and the distance between the tips as claimed. However, if it is argued that Krippelz lacks these features, then it would have been obvious to the ordinary artisan at the time of the instant invention to provide the modified invention of Krippelz with the pitch and tip to tip distance range as claimed in order to facilitate the best distances to affect the cut for a given material, since it has been held that where the general conditions of a claim are disclosed in the prior art,

Art Unit: 3724

discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233. Substantially the same applies to claim 18 and similar.
